

TOP TEN REASONS TO BUY A CLAYTON STEAM GENERATOR

8. SINGLE SOURCE

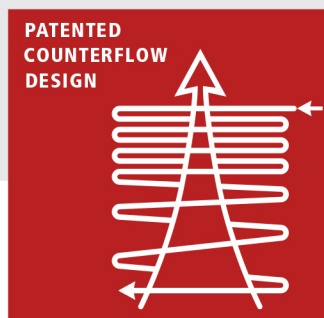

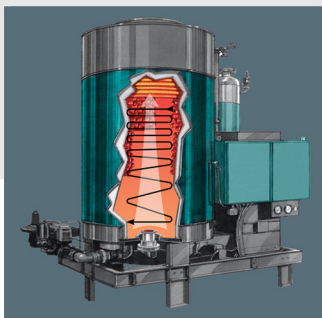

When purchasing a new boiler, it quickly becomes apparent that there are several necessary pieces of equipment that your boiler simply cannot operate without, such as a feedwater and chemical treatment system. In addition to these, there are several other pieces of associated equipment that come highly recommended in order to keep your boiler setup fully optimized, or that could be required by law depending on the location of your plant and its local regulations.

Acquiring all this additional equipment from multiple manufactures can be a hassle as you try to pick and choose individual components from various sources, and also leaves you to figure out which products are compatible with one another. Further, it can leave the responsibilities of the various parties involved undefined, which leaves you trying to sort out the confusion and coordinate between all of your suppliers if your project begins to fall behind schedule.

Clayton Industries offers more than just boilers, we're your one stop shop for your entire steam system. In addition to being your source for both the sales and service of high efficiency Steam Generators, we also design, manufacture, and supply a complete boiler system. After helping you select the ideal steam boiler configuration for your plant's operation, Clayton is also there to supply any required or recommended auxiliary components to your boiler system, regardless of your location or jurisdiction.

We offer a variety of standard and customized options, including feedwater and chemical treatment systems, deaerators and semi-closed receivers, as well as low emissions technology, economizer sections, blowdown tanks, pumps, monitoring devices, digital interfaces, and a variety of other options to keep your boiler running at its peak efficiency. Further, choosing Clayton to provide all your equipment guarantees that all of your individual components will run smoothly when fully assembled and installed, maximizing the life cycle and effectiveness of you boiler over time and reducing mechanical stress.

If you're looking to cut back on the confusion and find a single source to provide your entire steam system components, Clayton Industries is here to supply and service your complete boiler room setup.
