

STC WATER SOFTENERS

SINGLE TANK CLOCK MODELS

CLAYTON WATER SOFTENERS PROVIDE CONSISTENT WATER QUALITY

Soft make-up water is the first step toward satisfactory feedwater treatment for a Clayton Steam Generator. CLAYTON WATER SOFTENERS provide a state-of-the-art method for achieving a reliable soft water source. Softener size is determined by flow rate required, the raw water hardness and the volume to be softened between convenient regeneration periods. Mineral tanks are available in fiberglass or steel. For continuous duty applications, Clayton Model EFC twin softeners are recommended. Consult your Clayton representative for assistance in sizing and selection.
