

STEAMIN' DEMON

STEAM CLEANER

Versatile, In-Plant Cleaning System

The Clayton Steamin' Demon provides economical and efficient steam cleaning capability anywhere you have a high-pressure steam line. The Steamin' Demon effectively removes dirt, grease and heavy oils from most surfaces, making it ideal for cleaning, sanitation and maintenance. For added convenience, units can be installed at several locations or one unit can be moved from place to place.

The product easily attaches to most existing steam lines and is easily transportable from site to site. It costs about one-tenth the cost of a comparable fired steam cleaner and can be used (in plant) without emitting the pollution of a fired steam cleaner. It requires no electrical connection, only water, detergent and steam. Your own open-top, 55 gallon (208 liter) drum may be used for the solution concentrate.

Large industrial plants (such as oil refineries) have installed as many as 100 Steamin' Demons at multiple sites to perform periodic cleaning as necessary.

In addition, Clayton offers you factory direct service and parts in key industrial areas within the United States, Europe, Canada, Mexico and around the world.

SPECIFICATIONS

STEAMIN' DEMON (S000809)

- Solution discharge capacity, adjustable
- Steam operating pressure, adjustable
- Boiler capacity, required minimum
- Pipe connection required with valve
- Cabinet, steel with alkali-resistant baked enamel finish
- Concentrate solution suction equipment acid-resistant hose and non-corrosive strainer assembly

Suction hose length

Hose internal diameter

- Shipping weight
