Protect Your Investment with Clayton Water Treatment Chemicals and Service

COOLING SYSTEMS

Maintaining proper conditions in cooling systems can be a very demanding commitment. There are many different aspects to take into consideration when addressing the corrosion, scaling, fouling and microbiological control of your cooling system(s). Experienced Clayton Chemical Sales Engineers are prepared to help guide you through these challenges by offering and managing a proper water treatment program specific to your needs.

**DON'T SETTLE INSIST ON CLAYTON PRODUCTS AND SERVICES
FOR THE LIFE OF YOUR SYSTEM**

Objectives

Clayton recognizes cooling systems are a critical part of your facilities operations, corrosion, scaling, fouling and microbiological growth in your cooling systems can impact your bottom line in many different ways.

Clayton develops relationships with your staff and cares in helping you extend the life of your capital equipment investments and maintain proper heat transfer efficiencies of your cooling system(s).

Clayton objectives are to:

1. Provide a proper water treatment program at a competitive price.
2. Minimize energy, water and chemical consumption through improved heat transfer efficiency.
3. Reduce maintenance costs associated with equipment replacement and tower cleanings caused by poorly executed water treatment programs.
4. Identify any Health or Safety concerns that come with the operation of a cooling system(s).
5. Provide professional and technical support to help assure a successful water treatment program.

Product Line/Programs

Clayton Industries offers a full line of proven proprietary chemical formulations addressing the corrosion, scale and biological needs of your cooling system(s).

Clayton offers water treatment programs which are either a more traditional technology (liquid program) or the new 'state of the art' Smart Release technology (canister/flow program).

Clayton offers automated equipment which help control proper blowdown and allow parameters to be stabilized to help assure a clean cooling system(s).

Services

Clayton Chemical Sales Engineers conduct on-site surveys to tailor water treatment programs to help assure and maintain the integrity of the cooling system(s).

Clayton provides proactive technical support to help assure the recommended water treatment programs are being managed properly. Our Chemical Sales Engineers conduct routine on-site evaluations to help verify recommended parameters are being maintained allowing the cooling tower(s) to remain corrosion, scale and biologically free.

New 'state of the art' Smart Release technology (canister/flow program).

A more traditional technology (liquid program).
